Python

@leangaurav

1. WAP to print first **n** natural numbers (input n from user).
2. WAP to find sum of first **n** natural numbers
3. WAP to print first **n** natural numbers in reverse order.
4. WAP to input a number and print its factorial.
5. WAP to print Fibonacci sequence till **n**.
6. WAP to print all digits of a number input from user.
7. WAP to find sum of all digits of a number.
8. WAP to find sum of following series given n as input from user

   1 + 2! + 3! + 4! + 5! + ….n!

   Where **n!** denotes the factorial of number n.
9. WAP to input base and exponent and print result without using inbuilt function pow(use for or while loop).
10. Print following patterns:

11. Print following number patterns:

```
1
22
333
4444
55555
```

```
1
12
123
1234
12345
```

```
5
44
333
2222
11111
```

```
   1
  22
 333
4444
55555
```

12. Print following character patterns:

```
A
AB
ABC
ABCD
ABCDE
```

```
A
BC
DEF
GHIJ
KLMNO
```

13.

```
A
BB
CCC
DDDD
EEEEE
```

```
    A
   ABA
  ABCBA
 ABCDCBA
ABCDEDCBA
```
